

***Members of Pritchett Water Supply Corporation***  
***Notification of Maintenance /Repairs on Plant #10***

Beginning, Wednesday, March 3, 2021, Pritchett WSC will be doing mandatory maintenance on Plant #10, located at: 1525 Sycamore Rd., Big Sandy, TX. The tank will be bypassed and taken out of service for the duration of the maintenance to continue approximately 30 days. You will not be without water as water from other Plants and Wells will be redirected at this time. However, you may experience a variance of pressure and possible discolored water. The water has been disinfected and safe for use but due to pressure changes, minerals that discolor the water may be observed. We ask to please be patient as these maintenance issues must be addressed and completed. We also ask you to contact the office @ 903-734-5438 if you experience any issues to help us pinpoint problem areas, and please be conservative with water usage as much as possible. We apologize for any inconveniences during this time of maintenance. We have highlighted areas on the map for you to see if your water may be affected.

Only some area of these roads maybe affected, however, not all in their entirety;

***Sycamore, Saunders, Spruce, Aspen from FM 1002 to Red Cedar, FM 1002 from PR 3250 to Hwy 155, Hwy 155 from Big Sandy Creek to the “former” Longhorn Smokehouse, Persimmon from Hwy 155 to the Southern intersection of Weeping Willow, Weeping Willow from Persimmon to Wigington***
