

***Members of Pritchett Water Supply Corporation***  
***Notification of Maintenance/Repairs on Plant #2***

Beginning, today, Monday, October 11, 2021, Pritchett WSC will be doing mandatory maintenance on Plant #2, located at: 6040 FM 1795, Gilmer, TX. The tank will be bypassed and taken out of service for the duration of the maintenance to continue approximately 3 weeks. You will not be without water, however, you may experience a variance of pressure (maybe higher pressure) and possible discolored water. The water has been disinfected and safe for use but due to pressure changes, minerals that discolor the water may be observed. We ask to please be patient as these maintenance issues must be addressed and completed according to TCEQ standards. We also ask you to contact the office @ 903-734-5438 if you experience any issues to help us pinpoint problem areas, and please be conservative with water usage as much as possible. We apologize for any inconveniences during this time of maintenance.

Only some area of these roads maybe affected, however, not all in their entirety;

FM 1795 from Plant #2 to Lemon and South Live Oak to Holly to Hawthorne, including Hawthorne
