***Notification of Maintenance/Repairs on Plant #21***

Beginning, Monday, November 8, 2021, Pritchett WSC will be doing mandatory maintenance on Plant #21, located at: 149 Fed Fox Rd., Big Sandy, TX. The tank will be bypassed and taken out of service for the duration of the maintenance to continue approximately 4 to 6 weeks. You will not be without water, however, you may experience a variance of pressure (maybe higher pressure) and possible discolored water. We are installing a Pressure Reducing Valve to regulate the pressure in the Raintree area for the duration of maintenance. The water has been disinfected and safe for use but due to pressure changes, minerals that discolor the water may be observed. We ask to please be patient as these maintenance issues must be addressed and completed according to TCEQ standards. We also ask you to contact the office @ 903-734-5438 if you experience any issues to help us pinpoint problem areas, and please be conservative with water usage as much as possible. We apologize for any inconveniences during this time of maintenance.

All of the Raintree Lakes area, Groundhog and Hare Roads maybe affected.
